on any 30-year fixed chart, and understanding them is key to interpreting the data accurately. The Federal Funds Rate: While the Fed doesn't directly set mortgage rates, its benchmark rate influences the broader economy and the yield on bonds like the 10-year Treasury, which mortgage rates typically follow. Bond Market Dynamics: Mortgages are often packaged into securities sold to investors. The demand for these securities, influenced by their yield compared to other investments, directly affects the rates lenders can offer. Inflation Expectations: Lenders require a rate that provides a real return after accounting for inflation. Higher expected inflation typically leads to higher mortgage rates.
