Learn how to perform ultrasound on pregnant Planning a litter? A canine due date calculator takes the date of the first successful breeding and the typical 63-day gestation period to estimate when puppies will arrive. The tool gives owners a concrete timeline, helps schedule vet visits, and reduces the guesswork that often leads to missed prenatal care. The calculator adds 63 days (the average length of a dog's pregnancy) to the breeding date. If the breeding date is uncertain—common when multiple matings occur—most tools let you input the earliest and latest possible dates, producing a range rather than a single day. This range reflects natural
